Following up on FANGORIA's well-received first installment, we present the second issue of KISS: MONSTER—The Official Album and Tour Magazine, a limited-edition collector's mag featuring new interviews about the making of the new KISS album, as well as incredible, insightful features on the smash summer tour and other great moments in KISStory, past and present. And…it's in 3D!

That's right, inside you'll find 14 pages of exclusive new concert photos presented in dynamic three dimensions (glasses included): SEE Gene's ax thrust toward you, his blood dribbling right onto your lap! SEE Tommy's rockets aiming straight at your face! SEE Eric's drums rising right into your living room! SEE Paul swinging right from the crowd into your arms!

Other features include a new interview with MONSTER co-producer Greg Collins; the band reflecting on their recent pre-tour trip to London; artist Ken Kelly remembering the creation of the classic DESTROYER and LOVE GUN album covers; Gene Simmons talking about his memorable villainous movie roles; Paul Stanley flashing back to his stage role in THE PHANTOM OF THE OPERA; the top 30 alternative KISS klassics; a giant foldout KISS poster…and so much more!

This incredible collector's item will be sold exclusively through Fangoria.com, not in stores, and will be available for purchase October 23. Be sure to stay tuned for more details!
