The first image from CLOVERFIELD director Matt Reeves' LET ME IN (the English remake of the much loved LET THE RIGHT ONE IN) has appeared and it's of KICK-ASS' Chloe Moretz who takes on the role of the young vampiric girl, this time named Abby. Check it out below!

"Based on the acclaimed and award winning Swedish novel and film, LAT DEN RATTE KOMMA IN, LET ME IN is the story of Owen, a twelve year old boy who is feeling increasingly isolated and alone. Enduring the bitter divorce between his parents, and being the target of relentless bullies at school, the friendless and helpless Owen secretly spends his time entertaining thoughts of revenge against his tormentors.

When a mysterious young girl and her father move into the complex, Owen finds an unlikely friend in Abby. There's something different about Abby… she only ever seems to come out in the dark of night. But as the two get to know each other in the building playground, their friendship deepens, affording each of them the unconditional love and acceptance they crave.

When Owen finally learns just exactly what makes Abby so mysterious, their devotion and bond become unbreakable."

No doubt, the inclusion of the talented young actress has prompted many haters to quiet down a bit until the film is released, but it definitely has a long way to go before anyone's excited.

The image has now officially been released, here's a better look at it.
