Continuing to branch out into different areas of the horror genre, Doug Bradley explores Western bloodsucker territory in the British production A VAMPIRE'S TALE (pictured, a.k.a. UMBRAGE), which now has a U.S. disc and digital date, as does the Sasquatch saga BIGFOOT COUNTY. Read on for the details and cover art.

Lionsgate Home Entertainment releases VAMPIRE'S TALE (which we last reported on here) and BIGFOOT COUNTY on DVD, digital download and on demand December 11. The former was written and directed by Drew Cullingham and stars Bradley as an antiques dealer who, along with his family, is caught in the middle of the battle between succubus queen Lilith (Natalia Celino) and cowboy vampire Phelan (Jonnie Hum). Presented on the disc in 16x9-enhanced 2.35:1 widescreen with Dolby Digital 5.1 sound, the movie will be accompanied by:

• Audio commentary by Cullingham, Bradley and co-star James Fisher

• "Taking Umbrage: The Making of A VAMPIRE'S TALE" featurette

• Music video by The Hokie Joint

BIGFOOT COUNTY was written/directed by and stars Stephon Stewart, and is set in Siskiyou

County, CA, site of the most reported sightings of the legendary creature in the world. A documentary filmmaker and his crew head into the woods to capture the beast on tape, and the result is another found-footage adventure. This movie will be in 16x9-enhanced 1.78:1 widescreen with Dolby Digital 5.1 audio, and no special features announced. Retail price for each DVD is $26.98.
