---

As you probably know by now, Corey Feldman is back as Edgar Frog in *LOST BOYS: THE THIRST*, the second sequel to Joel Schumacher's 1987 film. The actor recently spoke about shooting *THE TRIBE* and its follow-up, and chimed in on Jamison Newlander's involvement as well as how *THE THIRST* pays tribute to the late Corey Haim.

[Movie Mikes](#) spoke with the actor, who had this to say: "I think as well done as part two was, we did a lot better with part three. The one thing I didn't like about the second film was that I was kind of in the trenches by myself. Edgar kept popping in every once in a while and it felt odd to me. It felt like one of those movies where they couldn't get it right. So the only way I was going to return for part three... If you remember I had it in my contract that Corey [Haim] had to be in the sequel [*THE TRIBE*] as well, and Warner Brothers kept their word. They shot some sequences with Corey. But because of the problems we had with Corey at the time, it wasn't usable. It wasn't their fault. It was just what it was. Corey wasn't able, at that point in his life, to deliver what we needed. So those parts were cut from the film and put in with the deleted scenes. And those scenes were done as pickups. When you see Corey and Jamison, their shots were pickups; they weren't in the same scene with me. And I felt isolated. It was like I was carrying this torch. But this time around, Jamison is in the film, and it is the return of the Frog brothers. And even though we didn't get to have Corey in this film, a reference is made to his character—where he is and what's going on with him. It really feels like a continuation of the first film as opposed to a completely separate chapter."

Click [here](#) to take a look at the trailer for *THE THIRST*, which is being helmed by *THE DEATHS OF IAN STONE*'s Dario Piana.
